# GX NEXT GENERATION DRY PUMPS

Giving you a clear edge

**PRODUCT DATASHEET** 

The GX dry vacuum pump series sets new standards for zero maintenance between major overhauls. Improved efficiency lowers the cost of ownership and provides continuous pumping duty throughout the pressure range. GX dry pumps include Ethernet connectivity allowing key data to be viewed via web pages, as well as a comprehensive set of networking options to assure continuous pump availability.

GX pumps are available in a wide range of peak speeds and variants to address applications from clean through to medium-duty processes. A modular design allows users to configure GX dry pumps to suit individual fab requirements. A compact footprint allows installation options including on-tool, close proximity, or remote.

## Features and benefits

Reduced cost of ownership

- Low power consumption
- Zero preventative maintenance

Flexible installation options

- Small and light for easy installation
- On-tool, close proximity, or remote

Consistent pumping performance globally

Pumping speed identical at 50 and 60 Hz

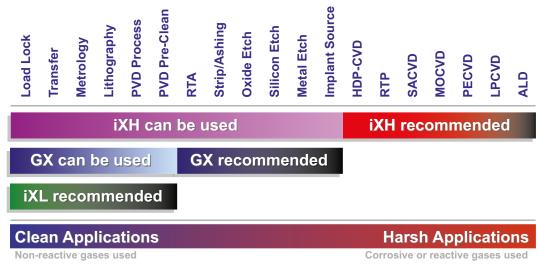

# **Specification**

|                              | GX                  | 100                  | 600                  | 1000                 |

<sup>(1)</sup> Average power at 700 T exhaust pressure

# **Applications**

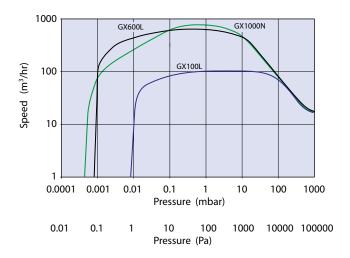

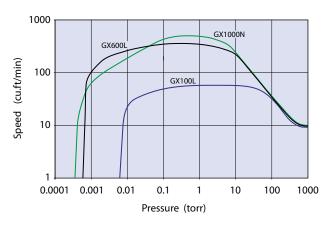

Contact Edwards for additional technical information on a particular application.

<sup>(2)</sup> Flow with optional Constant Flow Valve fitted

<sup>(3)</sup> Nitrogen purge can be manually adjusted to a maximum flow of 39 slm

## Speed curves

# Designed for Energy Efficiency

- High performance motors and inverter drives
  - Low operating power consumption
  - Lower power standby mode using Green Mode
- Nitrogen dilution can be tuned to the application requirement
  - Minimizes gas usage

- Highly efficient cooling
  - High conductivity materials and good design enables low water flow
- · Precision ceramic bearings
  - Very high load capability for reliability
  - Low noise and vibration

## **Ethernet Connectivity**

The GX Series includes unique web serving functionality that allows viewing of key parameters through a simple Ethernet connection and browser.

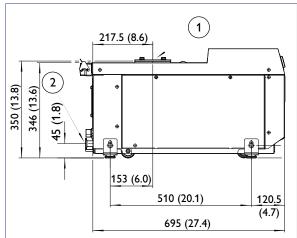

A user can connect to the pump using a browser and pump address to view a range of information, such as:

- · Operating status
- Key parameters
- · Parameter setpoints
- Alert summary
